PRAVIN

Software Developer | Full-Stack Development | Applied AI
Email: pravin.dev@example.com | GitHub: github.com/Pravin98651 | Location: India / Remote

PROFESSIONAL SUMMARY

Software developer with demonstrated expertise in building practical, full-stack systems and applied AI workflows. Experienced across the entire engineering lifecycle: system architecture, API design, relational data modeling, vector retrieval systems, responsive web dashboards, and distraction-free mobile applications.

FEATURED TECHNICAL PROJECTS

KidTube - Parent-Controlled Video Platform with AI Moderation

- Architected allowlist curation video system eliminating algorithmic rabbit holes for children.
- Built Next.js 14 parent console, Expo/React Native child app with touch-blocking overlays and math quiz tollbooth.
- Implemented concurrent TensorFlow.js + NSFWJS thumbnail safety screening and YouTube Data API v3 integration.

Job Hunt AI - Multi-Agent Job Discovery Platform

- Designed 2-node stateful workflow with LangGraph, asynchronously scraping 5 major job boards via asyncio.
- Implemented 3-layer deduplication: source ID, 0.92 cosine pgvector semantic match, and DB unique constraints.
- Engineered 5-dimension AI candidate-job matching via Google Gemini with robust keyword fallback.

Lexifyd Tamil - Applied AI Language Technology

- Engineered interactive language learning platform addressing Tamil polysemic root words.
- Utilized Google Gemini prompt chains to synthesize distinct word senses, contextual sentences, and distractors.

Multi-Role RAG Chatbot - Departmental Knowledge Assistant

- Built document ingestion system with 500-word paragraph-aware chunking and 50-word overlap.
- Embedded text via Sentence Transformers (all-MiniLM-L6-v2) with sub-15ms FAISS inner-product retrieval.
- Connected Groq API (Qwen-qwq-32b) for high-throughput citation-backed response generation.

TECHNICAL SKILLS

Frontend: React, Next.js 14, TypeScript, JavaScript, Vite, Tailwind CSS, Streamlit
Backend: Python, FastAPI, Node.js, Express, REST APIs, JWT Session Auth, Pydantic, SQLAlchemy
Applied AI & Retrieval: Google Gemini, LangGraph, RAG, FAISS, pgvector, Sentence Transformers, TensorFlow.js
Databases & Tools: PostgreSQL, Supabase, Firebase Firestore, Redis, SQLite, Git, Docker, Playwright
